

*Newport Ventures, in conjunction with NYSERDA provides education and support for Energy Code stakeholders throughout New York State.*

## INSIDE THE ENERGY CODE

### Maximizing Your Municipal Building's Energy Efficiency

Join NYSERDA's Clean Energy Communities Coordinators for a statewide webinar to discuss how local governments can **improve municipal facilities** while saving energy costs. Replacing outdated equipment with new smart and efficient technologies positions municipalities to save energy and money over time. These upgrades include **energy efficiency** and **renewable energy** projects in municipal buildings and facilities.

Clean energy upgrades show leadership and contribute to building healthier, more vibrant communities where people want to live and work. State programs can help municipalities implement projects with no or low up-front cost while generating net savings to improve your bottom line. Upgrades can help your community earn credit toward the NYSERDA **Clean Energy Communities designation**.
