Newport Ventures, in conjunction with NYSERDA provides education and support for Energy Code stakeholders throughout New York State.

INSIDE THE ENERGY CODE

NEWPORT  VENTURES

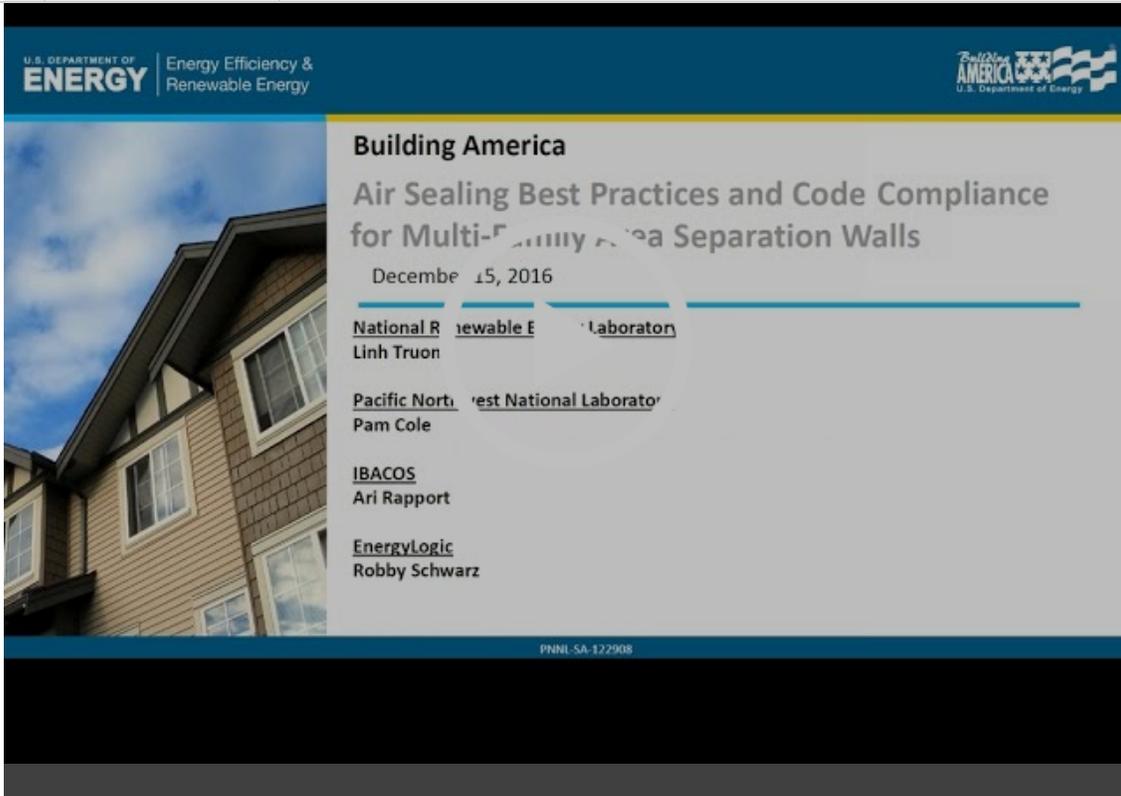

The Multifamily Air Sealing Dilemma

Air sealing in buildings reduces energy consumption and in multifamily settings it can also reduce the migration of noise and odors. But these same separation walls in multifamily buildings are also important fire rated assemblies which separate the units. In this December 2016 webinar sponsored by US DOE's Building America research program, the presenters cover the basics of UL fire rated assemblies, explore how energy and fire code requirements can cause conflicts, and describe best practices for air sealing.
